

Canadian Holiday Tax Break Guide for Shopify Merchants

From December 14, 2024 to February 15, 2025, the Government of Canada is implementing a GST/HST tax break on specific categories of goods. This document provides a comprehensive list of product categories that Shopify will zero-rate in Canada, during this period.

Reference: [Government of Canada Announcement](#)

Important Note: Products must be properly categorized in your Shopify store to ensure correct tax treatment. Please review and update your product categories as needed. Please note that these categories are based on loose requirements from the government. As a merchant, it's your responsibility to consult with local tax authorities or a tax professional to verify that you charge your customers the correct tax rates.

Implementation Notes

- Proper Categorization:** Products must be categorized into one of the below categories in your Shopify admin to ensure products are appropriately zero-rated during the tax holiday. Shopify will automatically handle tax calculations for properly categorized items.
- Time Period:** The tax exemption applies only to qualifying purchases made between December 14, 2024, and February 15, 2025.
- Post-Period Return:** Regular tax rates will resume after February 15, 2025

Merchant Checklist

- Review your product catalog against the qualifying categories.
- Ensure all products are correctly categorized.
- Use Shopify's [bulk editor](#) to update categories if needed.
- Monitor your tax settings during the exemption period.
- Plan for an automatic return to regular rates after February 15.

Reminders

- Categories must exactly match the approved list.
- New products added during this period should be carefully categorized.
- Keep records of any category changes made.
- Regular tax rates apply to all non-qualifying items.

Qualifying Shopify Categories

The full list of categories are available in the following pages:
